MAINTENANCE - FREE ENERGY - SAVING WINDOWS

CT 70 CT 70 PLUS CT70 HS SI82

LASTRIK

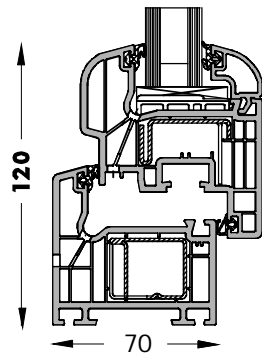

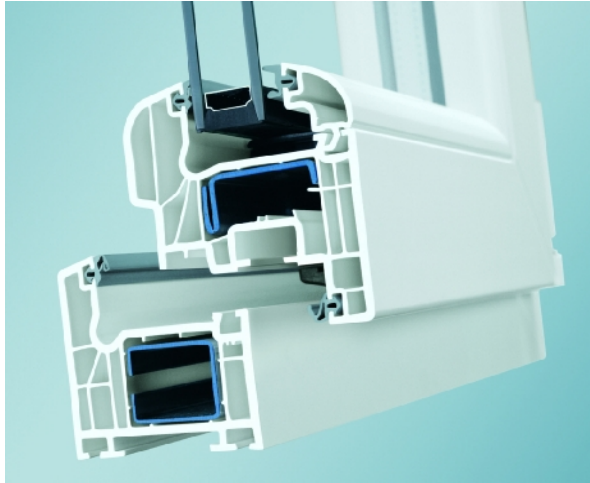

CT 70 CLASSIC

5 - cell
2 - gasket
 $U = 1,38$

- High-performance window and door system for a demanding customer.
- modern flat sash shape
 - optimised thermal insulation and stability
 - steel reinforcement
 - elegant „low visibility” silver-grey EPDM gaskets in white profiles (black in foiled)
 - U value up to 1.3 W/(m²K) possible with standard glazing
 - sound insulation up to 5 db - depending on profile and glazing
 - easy opening and closing due to special fault-tolerant construction
 - large choice of additional profiles helps to design complex constructions

Corona CT 70 Classic - colour range

Integration with the Corona colour range means that you can select from over 20 woodgrain and standard colours, laminated on one side or on both sides for maximum design flexibility.

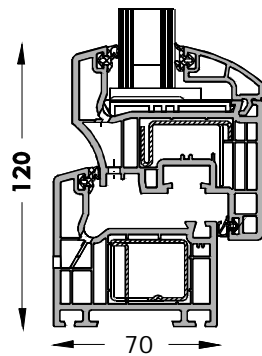

CT 70 RONDO

5 - cell
2 - gasket
 $U = 1,38$

- High-performance window and door system for a demanding customer.
- elegant rounded shape
 - optimised thermal insulation and stability
 - steel reinforcement
 - elegant „low visibility” silver-grey EPDM gaskets in white profiles (black in foiled)
 - U value up to 1.3 W/(m²K) possible with standard glazing
 - sound insulation up to 5 db - depending on profile and glazing
 - easy opening and closing due to special fault-tolerant construction
 - large choice of additional profiles helps to design complex constructions

Corona CT 70 Rondo - colour range

Integration with the Corona colour range means that you can select from over 20 woodgrain and standard colours, laminated on one side or on both sides for maximum design flexibility.

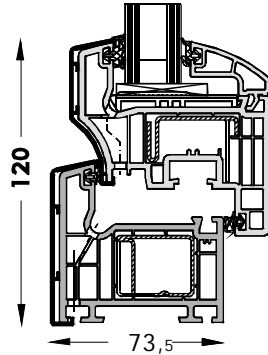

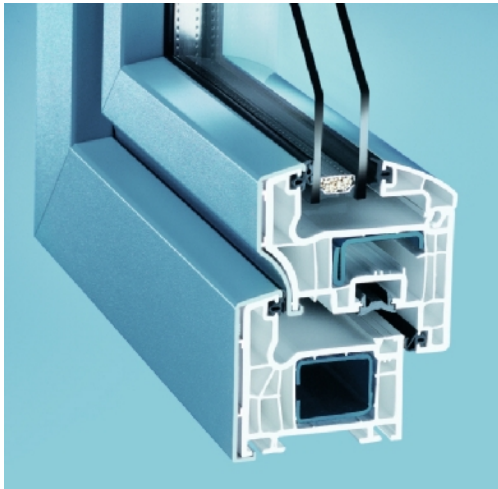

CT 70 CAVA

5 - cell
2 - gasket
 $U = 1,38$

- High-performance window and door system for a demanding customer.
- unique concave contour
 - optimised thermal insulation and stability
 - steel reinforcement
 - elegant „low visibility” silver-grey EPDM gaskets in white profiles (black in foiled)
 - U value up to 1.3 W/(m²K) possible with standard glazing
 - sound insulation up to 5 db - depending on profile and glazing
 - easy opening and closing due to special fault-tolerant construction
 - large choice of additional profiles helps to design complex constructions

Corona CT 70 Cava - colour range

Integration with the Corona colour range means that you can select from over 20 woodgrain and standard colours, laminated on one side or on both sides for maximum design flexibility.

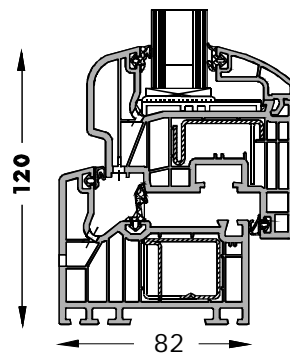

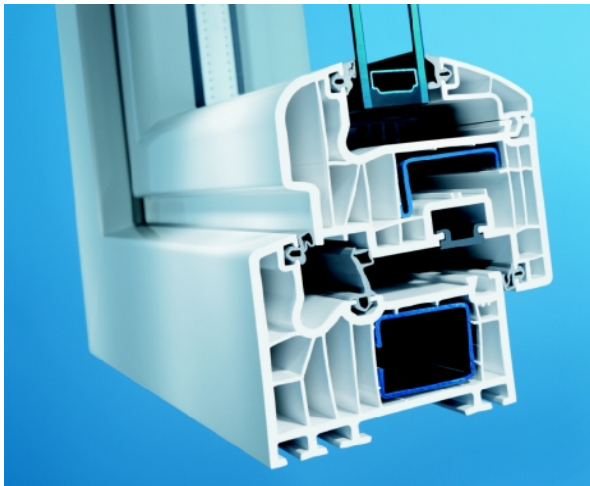

CT 70 PLUS

5 - cell
2 - gasket
U = 1,38

Window and window-door systems with the aluminium cladding

Low-energy window and door system with the appearance of aluminium windows

- retains all characteristics of the CT70 range
- high level of resistance and long life
- almost totally resistant to environmental influences
- durable PVC-U surfaces that are easily maintained on the inside
- a choice of black or silver-grey gaskets
- virtually unlimited choice of RAL colours

SI 82

6/7 - cell
3 - gasket
U = 1,11

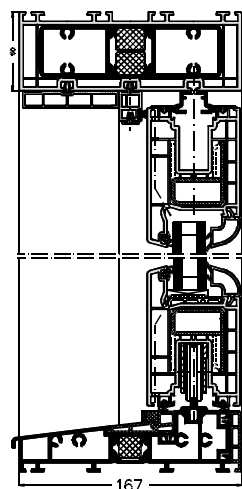

The innovative „smart“ PVC-U system for maximum energy saving.

Now you can build low-energy windows economically and to a high standard.* Corona SI 82

- 6/7-cell profile for excellent thermal and sound insulation
- specially designed drainage system for optimum protection against wind, rain and noise
- Uw values up to 0.9 W/(m2K) **
- triple gasket for maximum sound and weather insulation
- steel reinforcement for maximum stability
- increased protection against break-in
- silver-grey low visibility gaskets on white profiles

* Lastrik recommends using Corona SI82 with super-low energy triple glazing and „smart“ low G-factor glass. Contact us for more details.

** depends on glass

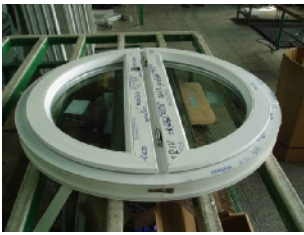

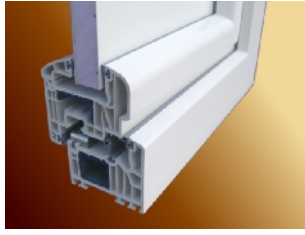

CT70 HS

Lift-and-slide doors in PVC-U for patios, balconies and conservatories. Make your room a truly open space.

- flat easy-access threshold
- excellent thermal insulation with specially-designed reinforcement and threshold
- multi-chamber profiles for optimum, long-lasting stability and thermal or sound insulation
- high-quality sealing for excellent weatherproof design
- smooth-running sliding fittings
- easy and quick opening
- help to make a room feel bigger

Corona CT 70 HS profile range can be supplied directly from stock in 17 different colours in both single-sided and double-sided designs. Lastrik offers a range of space-saving door solutions such as tilt-slide or folding doors. Contact us now for more details.
